Transforming the future

Every business needs knowledgeable, well motivated and forward thinking staff to make an effective contribution to future strategy.

Leicester Business School is in a prime position to help, by providing a portfolio of tailored education programmes, designed to inspire and educate a wide cross-section of managers and leaders throughout the public, private and third sectors.

We have a proven track record that spans 25 years and pride ourselves on taking a highly innovative approach to management education, combining business acumen with academic excellence to achieve real and tangible results.

Flexible solutions

To ensure we meet the specific needs of your business, we offer total flexibility in terms of content, delivery, timing and location and will work collaboratively with your team to design a cost-effective solution.

We can offer you an existing programme from our portfolio or tailor a programme to suit your commercial and cultural focus, creating a new qualification or pathway for your organisation's exclusive use, with appropriate entry and exit levels for your managers.

Options range from vocational courses and non-accredited Master Classes to Degrees and Masters qualifications, all incorporating theoretical, applied and reflective learning techniques to ensure learning is embedded in the workplace.

Our programmes are constantly evolving to reflect the very latest thinking. They will equip your staff with the knowledge and skills to make a real difference within your organisation and enable them to realise their potential.

“I now have the ability to understand the big picture in relation to matters of strategic importance to the business which enables a more intelligent approach to business decision making.”

RWE npower student

Leicester Business School has helped hundreds of managers to develop their leadership and management capabilities. Our client list includes leading organisations across a wide range of industries, and we are proud to work with each of them to support their learning and development strategies.
